PROFESSIONAL SUMMARY

Founder of Teeny Tech Trek, an AI solutions studio building practical AI systems for businesses. Work at the intersection of applied AI, business strategy, and execution : designing AI agents, RAG-based chatbots, workflow automation, and agentic systems that move companies beyond prototypes into real operational use. Strong foundation in applied AI, project delivery, client communication, and AI governance, with a focus on solutions that are practical, reliable, and responsible.

TECHNICAL SKILLS

Languages & Frameworks: Python · JavaScript / TypeScript · Node.js · React · FastAPI · PyTorch · scikit-learn

AI / LLM: RAG · Agentic & multi-agent systems · Prompt engineering · Tool use / MCP · Anthropic Claude, OpenAI, Gemini · Hugging Face Transformers · LangChain

Data & Infrastructure: SQL · MongoDB · Neo4j · Redis · FAISS · Qdrant · AWS S3 · Docker · Git / GitHub

Practice: Responsible AI & governance · Evaluation · Project & client delivery

EXPERIENCE

Teeny Tech Trek : Founder & AI Engineer

Mohali, India (Remote) · Sept 2024 – Present

- Built and shipped AI systems : RAG chatbots, multi-agent pipelines, AI avatars, and workflow automation : for 5–6 clients (via Upwork and professional networks), achieving 80%+ accuracy and efficiency across deployed systems
- Own each engagement end-to-end: scoping, success-metric definition, evaluation, deployment, and post-launch iteration; maintain 10+ public GitHub repositories spanning agentic systems and RAG
- Translate ambiguous client problems into reliable, production-ready solutions aligned with real business needs

Appu International : Project Manager, Business Development

Ludhiana, India · June 2024 – Present

- Manage international technology project delivery; translate client requirements into structured execution plans and track progress against milestones

StartGBC, George Brown College : Support Advisor

Toronto, Canada · Sept 2023 – Dec 2023

- Advised early-stage student founders on product validation, market analysis, and technical scoping through structured mentorship

CETPA Infotech : Frontend Developer

Noida, India · Feb 2021 – Jul 2021

- Developed responsive web interfaces, building a foundation in JavaScript, React, and front-end engineering

SELECTED PROJECTS

NexEstate : Production AI-Avatar SaaS | MERN, Razorpay | [Live](#) | [GitHub](#)

- Shipped a multi-tenant SaaS platform with personalized AI avatars, lead scoring, visit scheduling, dashboard analytics, and payments : full end-to-end product with JWT auth and streaming chat

TTT Website Chatbot : Hybrid RAG + Knowledge-Graph Assistant | FastAPI, FAISS, Neo4j, Claude | [Live](#) | [GitHub](#)

- Engineered a 4-layer architecture routing ~80% of low-risk queries through deterministic layers : cutting hallucination risk and cost; combined FAISS retrieval with a Neo4j knowledge graph for grounded responses

Neo Scripting : 10-Agent Orchestrator Pipeline | Gemini, OpenAI, OpenRouter, Langfuse | [GitHub](#)

- Architected a 10-agent content pipeline with provider-fallback routing and Langfuse observability; exposed an MCP server for Claude/Cursor and integrated Qdrant for vector retrieval

EDUCATION

Post-Graduate Certificate, Project Management : George Brown College, Toronto · Dean's Honors

2023 – 2024

Post-Graduate Certificate, Applied AI Solutions : George Brown College, Toronto · Dean's Honors

2022 – 2023

B.Tech, Computer Science Engineering : CGC University (Jhanjeri), Mohali

2017 – 2021

CERTIFICATIONS

AI Fluency (Anthropic) · AI Security & Governance (Securiti) · Python for Data Science & AI (IBM) · Enterprise Design Thinking – Practitioner (IBM)
