## PROFESSIONAL SUMMARY

AI Product Manager and Business Analyst who takes AI from demo to deployed. Founder of Teeny Tech Trek LLP, India, delivering production RAG systems, AI agents, and workflow automations for 10 clients with 100% on-time delivery, owning scoping, success metrics, evaluation, and stakeholder alignment end to end. Postgraduate certificates in Applied AI and Project Management from George Brown College, Dean's Honour List all four terms.

## CORE COMPETENCIES

**AI & Product:** Retrieval-Augmented Generation (RAG) · AI agents & agentic workflows · LLM orchestration & prompt engineering · Model Context Protocol (MCP) · AI evaluation frameworks · Responsible AI & governance · Product strategy & roadmapping
**Strategy & Analysis:** Structured problem-solving · Quantitative & qualitative analysis · Business case development · Requirements gathering · Success-metric definition · Performance & milestone tracking
**Data & Modeling:** Python · SQL · Business modeling · Statistical evaluation and model benchmarking · Data synthesis · Dashboards & analytics
**Communication & Delivery:** Executive-ready materials · Cross-functional collaboration · Stakeholder management · Project scoping & execution planning · Agile delivery · Vendor & contractor management

## EXPERIENCE

**Teeny Tech Trek** — Founder & AI Consultant *Mohali, India · Sept 2024 – Present*

- Deliver production-grade RAG chatbots, AI agents and workflow automations for 10 clients across Real Estate, Immigration and Education, with 100% on-time delivery and automations saving 20+ hours of manual work per week
- Architected and shipped the Tech Trekkers Suite, three production AI agent products on one shared agentic engine, owning engagements end to end from requirements and solution architecture through delivery, evaluation and post-launch iteration
- Manage a team of 5 developers while partnering directly with stakeholders to define success metrics, characterise failure modes and align solutions with real operational constraints

**Appu International** — Business Development Manager *Ludhiana, India · June 2024 – Aug 2026*

- Manage international client relationships across 3 markets from RFQ and quotation through negotiation and fulfilment, coordinating production, quality and logistics to hit 90% on-time delivery
- Lead automation R&D across machine-level and business processes, piloting sensor-based monitoring and finished-product testing that cut downtime by 3%, and deploying 5 AI and n8n process automations that saved 10 hours per week

**StartGBC, George Brown College** — Support Advisor *Toronto, Canada · Sept 2023 – Dec 2023*

- Advised early-stage student founders on market analysis, product validation and go-to-market planning, and designed the Entrepreneurship Club that grew out of it, authoring its programming model, constitution and operating plan; the club launched and continues to run student-led

## PROJECT

**Tech Trekkers** | Live | GitHub
Architected and shipped the Tech Trekkers Suite, three production AI agent products on one shared agentic engine covering conversational runtime, RAG grounding, lead scoring, multi-tenancy. Nex-Estate is an AI real estate assistant with built-in CRM, NetTwin turns a resume and website into a conversational digital twin, and Neo-Script is an MCP-native multi-agent content pipeline running inside Claude Desktop, Cursor and Windsurf. Capability built once transfers by configuration rather than rebuild.

## EDUCATION

**Post-Graduate Certificate, Project Management** — George Brown College, Toronto · Dean's Honors *2023 – 2024*
**Post-Graduate Certificate, Applied AI Solutions** — George Brown College, Toronto · Dean's Honors *2022 – 2023*
B.Tech, Computer Science Engineering — CGC University, Mohali *2017 - 2021*

## CERTIFICATIONS

Enterprise Design Thinking – Practitioner (IBM) · Python for Data Science & AI (IBM) · AI Security & Governance (Securiti) · AI Fluency (Anthropic)
